Subject: RE: Potential PA request radioactive pipe in Bristow OK
Date: Monday, February 03, 2014 12:39:00 PM

To All,

I am not sure the pipe was removed, but the gentleman indicated it was on the site and was radioactive. His name is (b) (6) and I believe his wife name is (b) (6). They live at (b) (6) (b) (6). His wife's e-mail is (b) (6). His number is (b) (6). He indicated the pipe was on his cousins property, and they could show us exactly where they found it.

Thanks,

Bill

Was pipe removed from Wilcox site or some other site? Was Mr. Hayes informed?

I will get the name of the person from Bill Little tomorrow and will share with you.

Brenda:

During the Wilcox Oil Refinery Open House on 1/30/2014, one of the residents mentioned removing

a pipe, taking it somewhere and that it was rejected because it was radioactive. That he could identify where the pipe was removed. Is sort of a confusing story. I don't have the full details.

I asked the person commenting about this to identify in a map, or provide us with a more precise location, where was or were the pipe. That he could request a Preliminary Assessment (PA) and he could contact you with a precise location of the area of concern. Be on the lookout if you get a call for a PA.

Todd Downham:

Do you recall hearing this in the Open House? Do you have any further information? Do you know the name of the person who made those comments?
